PRINCIPAL RISKS	
Risk of capital loss	The fund is not guaranteed or principal protected, initially invested capital may not be returned.
Discretionary management risk	
	The fund may not always be exposed to the best performing assets. Changes in the valuation of both long and short positions may negatively impact the fund Net Asset Value.
Equity market risk	
	Equity prices variation may negatively impact the fund Net Asset Value.
Credit and interest risk	
	The fund may invest in bonds or negotiable debt securities, thereby exposing to credit risk. Rising interest rates may negatively impact the fund.
